## SUMMARY

A student in institute Universitaire de la cote in Douala at Akwa studying Management Information System in Bachelor of Applied computing

## EXPERIENCE

### Internship from July 25 – 30 August

The internship took place at bonapriso a company named **GIC**  
**(GLOBAL IT COPORATION)**

It's a networking and programming company which deals with the arranging of digital problems.

- I learned a programming language which is called Python with the framework Django.
- I used it to help in the building of the company's website.
- I also learned how to install cameras and how to arrange the issues of connection problems, and most importantly I learned how to work as a team and how to interact with different People.
